

## BENEFITS OF LED LIGHTING IN RETAIL APPLICATIONS

MP Lighting's LED interior luminaries and lighting systems are the ideal solution for illuminating retail applications, including stores, display windows, artwork, and exhibits.

- LED spotlights, cabinet, linear, pendant, and recessed downlights can be used to achieve task, ambient, and spot lighting in each application
- LED's produce high luminous efficacy, are energy efficient, and offer a long product life
- LED's are free of harmful infrared and ultraviolet light, ensuring optimal protection of products, clothing, fabric, paper, and artwork from discoloration and fading
- LED's are equipped with thermal heat sinks to help dissipate excess heat
- High powered LEDs are available in a variety of color temperatures, ranging from cool to warm white
